EDGE READY™ ImageCal R – Clear

Feature	Benefit
Edge READY™ Manufactured and converted by Gerber for use with GerberColor™ Foils and the GERBER EDGE®.	♦ Optimal printing results means less wasted material and greater profits. Superior finished product translates into repeat business.
Precision punched.	♦ Precise punch pattern provides outstanding print registration with the EDGE and perfect tracking through Gerber plotters. This means less wasted material, greater productivity and increased profits.
Removable adhesive system	♦ Saves time and money by eliminating the need for heat and chemicals when stripping old graphics. More time can be spent on providing new graphics to the same customers. ♦ Changeable graphics create a greater opportunity for the EDGE owner to sell more products to the same client.
Polymeric Calendered Vinyl	♦ High-quality, calendered construction is more stable than monomeric calendered vinyls. ImageCal's quality means a better finished product and that leads to repeat business.
Clear vinyl and adhesive	♦ Allows the EDGE owner to create window graphics, second surface displays etc. and appeal to a broader range of clients. ♦ Graphic takes on the background color of its substrate.
4 to 5 mil	♦ Application tape may not be required when transferring small ImageCal "P" graphics. Eliminating that step from the application process will save time and money.

Gerber ImageCal "R" is suitable for use in interior and short-term exterior signs, second-surface applications, point-of-purchase, and window displays. The adhesive system allows for removal of the graphic for up to 6 months after application without using heat or chemicals and without leaving an adhesive residue.

GERBER
TECHNOLOGY

NUMBER OF COLORS	1 (clear)
PERFORMANCE LIFE (UNPRINTED)	6 months
MINIMUM APPLICATION TEMP	50°F (10°C)
THICKNESS	4 to 5 mil
LENGTHS AVAILABLE	10 and 50 yards.
